

SUPPORTING CITIZEN AND COMMUNITY LED CRISIS RESPONSE

Get the Basic Tools to Support Local Agency

Integrating local response and spontaneous self-help in crisis situations after a natural disaster or a conflict is not an easy task. This training developed and conducted by the [Local2Global Protection Initiative](#) (L2GP) will help participants understand and support survivor & community-led crisis responses (sclr) in a manner that fits local realities and adds to resources already present with affected citizens and communities. This hands-on training introduces participants to the core elements in this way of working. The focus is on practical experience with the tools needed to support genuinely community-led responses that serve both immediate needs but also attempts to reduce future vulnerability and increase resilience of crisis-affected communities. For more on the sclr way of working please see the short video [here](#).

NGO staff working as program officers, managers, sectoral specialists, quality and accountability experts or senior management staff are invited to apply for the training. Please note: We encourage applications by several staff working for the same organisation who may then work together during group work. But this is not precondition - we very much also welcome individuals to join the training.

The training will be conducted by experienced trainers of Local 2 Global Protection. Simone di Vicenz will lead the training, supported by Nathalie Töpperwien Blom. Both are practitioners and trainers with years of significant experience in the sector and a work focus on participatory methods and strengthening resilience of communities affected by crisis.

WHEN?

26, 30 November and 03
December 2020 (3 full days)
and 27 November (½ day)

WHERE?

Online with Zoom

REGISTRATION

Please register [here](#) until
15 November 2020.
